## Time Setting

The Mini DV serials products from Popever Enterprise Limited can produce videos with time & date stamped on the video clip in the following format: YY.MM.DD HH:MM:SS

To set time as follows step by step:

- a. To create a new text file named 'time.txt', open it and add the correct time you want into it, for example: 2009.06.20 09.30.23 which is your local time and date. Please double check to ensure it is in the correct format.
  
- b. Connect mini DV(with TF card plugged in) to your PC, click 'My Computer' on you desktop and find your mini DV, for example (H:), then copy and paste the file 'time.txt' to the root of (H:). Disconnected your mini DV from your PC.
  
- c. Turn on the mini DV, if the light indication works fine, Congratulation! You have successfully set the time.
